

Get market data for a variant

Get Market Data API allows you to obtain basic market data - the highest Bid and lowest Ask amount for a given variant. If the product id doesn't contain the specified variant, a validation error will be returned.

Note:

- We have deprecated the country param as the market data will now be based on your market.
- Based on your region, the response object may vary.
- Undercut protection is disabled. The system may automatically set a price (beat US) just below your own, even if you're already the lowest, because it doesn't consider your current 'Ask' price.

PATH PARAMETERS

productId
required
string
Unique identifier for a product

variantId
required
string
Unique identifier for a products variant

QUERY PARAMETERS

currencyCode
string (CurrencyCode)
The currency code this product is being listed in.

Available values: "AUD", "CAD", "CHF", "EUR", "GBP", "HKD", "JPY", "KRW", "MXN", "NZD", "SGD", "USD"

Enum: "AUD" "BRL" "CAD" "CHF" "CLP" "CNY" "DKK" "EUR" "GBP" "HKD" "HUF" "IDR" "ILS" "JPY" "KRW" "KWD"
"MOP" "MXN" "MYR" "NOK" "NZD" "PEN" "PHP" "PLN" "SEK" "SGD" "THB" "TWD" "USD" "VND"

country
string

Deprecated

ISO Alpha-2 code representing the country you need the market data for. If not provided, will default to your country.

RESPONSE SCHEMA: application/json

productId
required
string
Unique identifier for this product

variantId
required
string
Unique identifier for this product variant

currencyCode
required
string

The currency code. If not provided, it will default to USD. Only valid currencies supported on stockx.com are supported via API.

Available values: "AUD", "CAD", "CHF", "EUR", "GBP", "HKD", "JPY", "KRW", "MXN", "NZD", "SGD", "USD"

lowestAskAmount

string or null

The lowest ask for the product variant listed in the market.

highestBidAmount

string or null

The highest bid for the product variant listed in the market.

sellFasterAmount

string or null

The price you have to list at, inclusive of duties and taxes, to become the lowest Ask to buyers in the United States, and also includes checks to recommend a competitive price compared to recent global sales.

earnMoreAmount

string or null

The price you have to list at, inclusive of duties and taxes, that maximizes your earnings by staying competitive with recent global sales.

flexLowestAskAmount

string or null

The Flex program's lowest ask for the product variant listed in the flex market.

standardMarketData

>

object

The standard market data for the product variant.

flexMarketData

>

object

The Flex market data for the product variant.

directMarketData

>

object

The market data for the product variant in the Direct market.

400 Variant does not belong to the product.
